

New challenges for full integration of DIs within EURAMET

Denmark
Thursday 18 and Friday 19 February 2016

Session 1: Organisation of EURAMET, opportunities and benefits for participation in EURAMET committees and R&D programmes (EMPIR)

- EURAMET structure of NMIs and DIs, legal and practical aspects
- Mission of NMIs/DIs, relation to Metre Convention
- EURAMET cooperation with NMIs and DIs. Responsibility for representing the national metrology system to EURAMET, participation in EURAMET life and work.
- Practical relevance for the DIs, like participation in EMPIR

Session 2: CIPM MRA, CMC processes, QMS, accreditation

- CIPM MRA implementation (CMC, QMS, ILC, ...).
- Difference between CIPM MRA and accreditation
- TC-Q QMS reviewing

Session 3: CIPM, EURAMET and national responsibilities and authorities

Session 4: Success stories of EURAMET members

- Successful coordination on national level (two or three DI's view; benefit of their activities at national and international level for R&D, services, participation in TCs, CIPM MRA matters, trainings, relations with their NMIs and designating authorities, etc...), exchange with the attendees.
- Presentation of some case studies/success stories to demonstrate various possible solutions.

Session 5: Proposals/ideas/suggestions/observations from the participants

- How DIs and NMIs would like to contribute to making cooperation in EURAMET long-term sustainable.
- Expectations / wishes

Session 6: Conclusions/recommendations

Round table to capture possible improvements and immediate actions that DIs and NMIs would like to see from EURAMET as an RMO, suggestions for optimization of operations.

Possible Participants

- NMI and DI Representatives
 - National designating and financing authorities
 - EURAMET TC Chairs
-
