

EUROMET PROJECT
~~PROGRESS~~/FINAL REPORT

1	Ref No.: 289	2	Field: LENGTH	
3	Type of collaboration: Co-operation in Research			
4	Partners: GB, DE, FR, DK, IT, NL, FI			
5	Subject: Workshop on the traceable measurement of surface texture			
6	<p>Progress:</p> <p>The workshop was attended by 16 delegates from NMIs, industry and universities in 7 states. Two other states had expressed an interest in attending (IS and SE) but were unable to attend. The purpose of the meeting was to learn about the state of traceable surface texture measurement in Europe and against this objective the experts attending the workshop agreed that it had:</p> <ul style="list-style-type: none"> * confirmed the growing need to manufacturing in a wide range of industries in Europe for the traceable measurement of surface texture * provided awareness of the surface texture measurement services offered by the NMIs * improved awareness of the research work needed and being carried out in NMIs * led to a much better understanding of the needs of some industrial sectors * helped to provide a greater appreciation of the difficulty of developing measurement standards and specification standards.
