

**EUROMET PROJECT
PROGRESS/FINAL REPORT^{*)}**

1. Ref. No.:834	2. Subject Field:Mass	
3 Type of collaboration:Comparison		
4A. Partners: INM, UME (institutions)		4B. CEC funded? No
5. Participating countries: RO, TR		
6. Title: Bilateral comparison in the field of pressure measurement		
<p>7. Progress:</p> <p>The comparison measurements in the range (1...35) MPa were carried out in two phases:</p> <ul style="list-style-type: none"> - at the pressure laboratory of the INM - at the pressure laboratory of the UME <p>The transfer standard was provided by INM (DH-Budenberg pressure balance). The task of the measurements was to compare the effective area of the INM transfer standard, by comparing it with the national standard of INM and the national standard of UME, in order to estimate the agreement between the pressure scales of the two countries.</p> <p>The results of this comparison confirmed the agreement between the oil pressure scales.</p> <p>The results are reproduced in the attached file. Detailed results will also be presented IMEKO 20th TC3 & 3rd TC16 International Conference to be held in Mexico in November 2007</p>		
<p>8. Coordinator 's name: Dr Ilknur Kocas</p> <p>Address: TUBITAK UME Anibal Cad. MAM Kampusu Besevler, 41470, Gebze, KOCAELI TURKEY</p> <p>Telephone: Fax: E-mail:</p> <p>+90 262 6795000 +90 262 6795001 ilknur.kocas@ume.tubitak.gov.tr</p>		
9. Completion date: 18.05.2006	10. Coordinator 's signature: 	11. Date: 21.06.2006
