

Implications for EURAMET TC-Q reporting

Silvie Hoffmanova
EURAMET, TC-Q secretary

EURAMET Webinar on changes to ISO/IEC 17025
19 June 2019

Transition period within the TC-Q

All **initial** presentations of NMIs/DIs shall be in accordance with the requirements of the ISO/IEC 17025:2017 standard.

All **initial** presentations of NMIs/DIs involved in CRM production shall be in accordance with the requirements of the ISO/IEC 17034 standard.

2020 TC-Q meeting, **re-evaluation** reports and presentations meeting the requirements of either the 2005 or 2017 edition of the ISO/IEC 17025 standard are allowed

For the 2020 TC-Q meeting, **re-evaluation** reports and presentations of CRM producers shall be in accordance with the requirements of the ISO 17034 standard only.

Annual reporting

In 2019 all NMIs/DIs submitted the **gap analysis and action plan** covering the short summary about the current status of the QMS on the way to transitioning to the requirements of the ISO/IEC 17025:2017 standard and the ISO 17034 standard.

Reports were evaluated by the TC-Q SC in the same way as the QMS Annual Reports and feedback was provided to NMIs/DIs.

- in some cases, NMI/DIS were asked for complementary information or even updating version of report,
- frequent missing information were about training, risk assessments and auditing,
- transition is not only changing the documents!

Implementation of the action plan and the transition to the new standards is monitored through **Annual report**:

Point 6 – Progress on implementation of actions from the gap analysis

- the implementation of actions performed during the year, which have been identified in gap analysis and planned in action plan,
- any changes and delays,
- if transition is finished.

Annual reporting

Due to the transition period and to keep the consistency of evaluation of the reports, the same evaluators will be assigned to the Annual reports of 2019.

SC members will report to TC-Q secretary about the status of the transition of QMS and this will be registered to the pending actions table as follows:

- F** transition of QMS to new standard has been finished,
- P** transition of QMS to new standard is pending,
- NP** transition of QMS to new standard was not performed.

The Annual report of the year 2020 shall be according the ISO/IEC 17025:2017 requirements.

Thank you for your attention!
