Acts whose titles are printed in light type are those relating to day-to-day management of agricultural matters, and are generally valid for a limited period.  
The titles of all other acts are printed in bold type and preceded by an asterisk.

DIRECTIVES

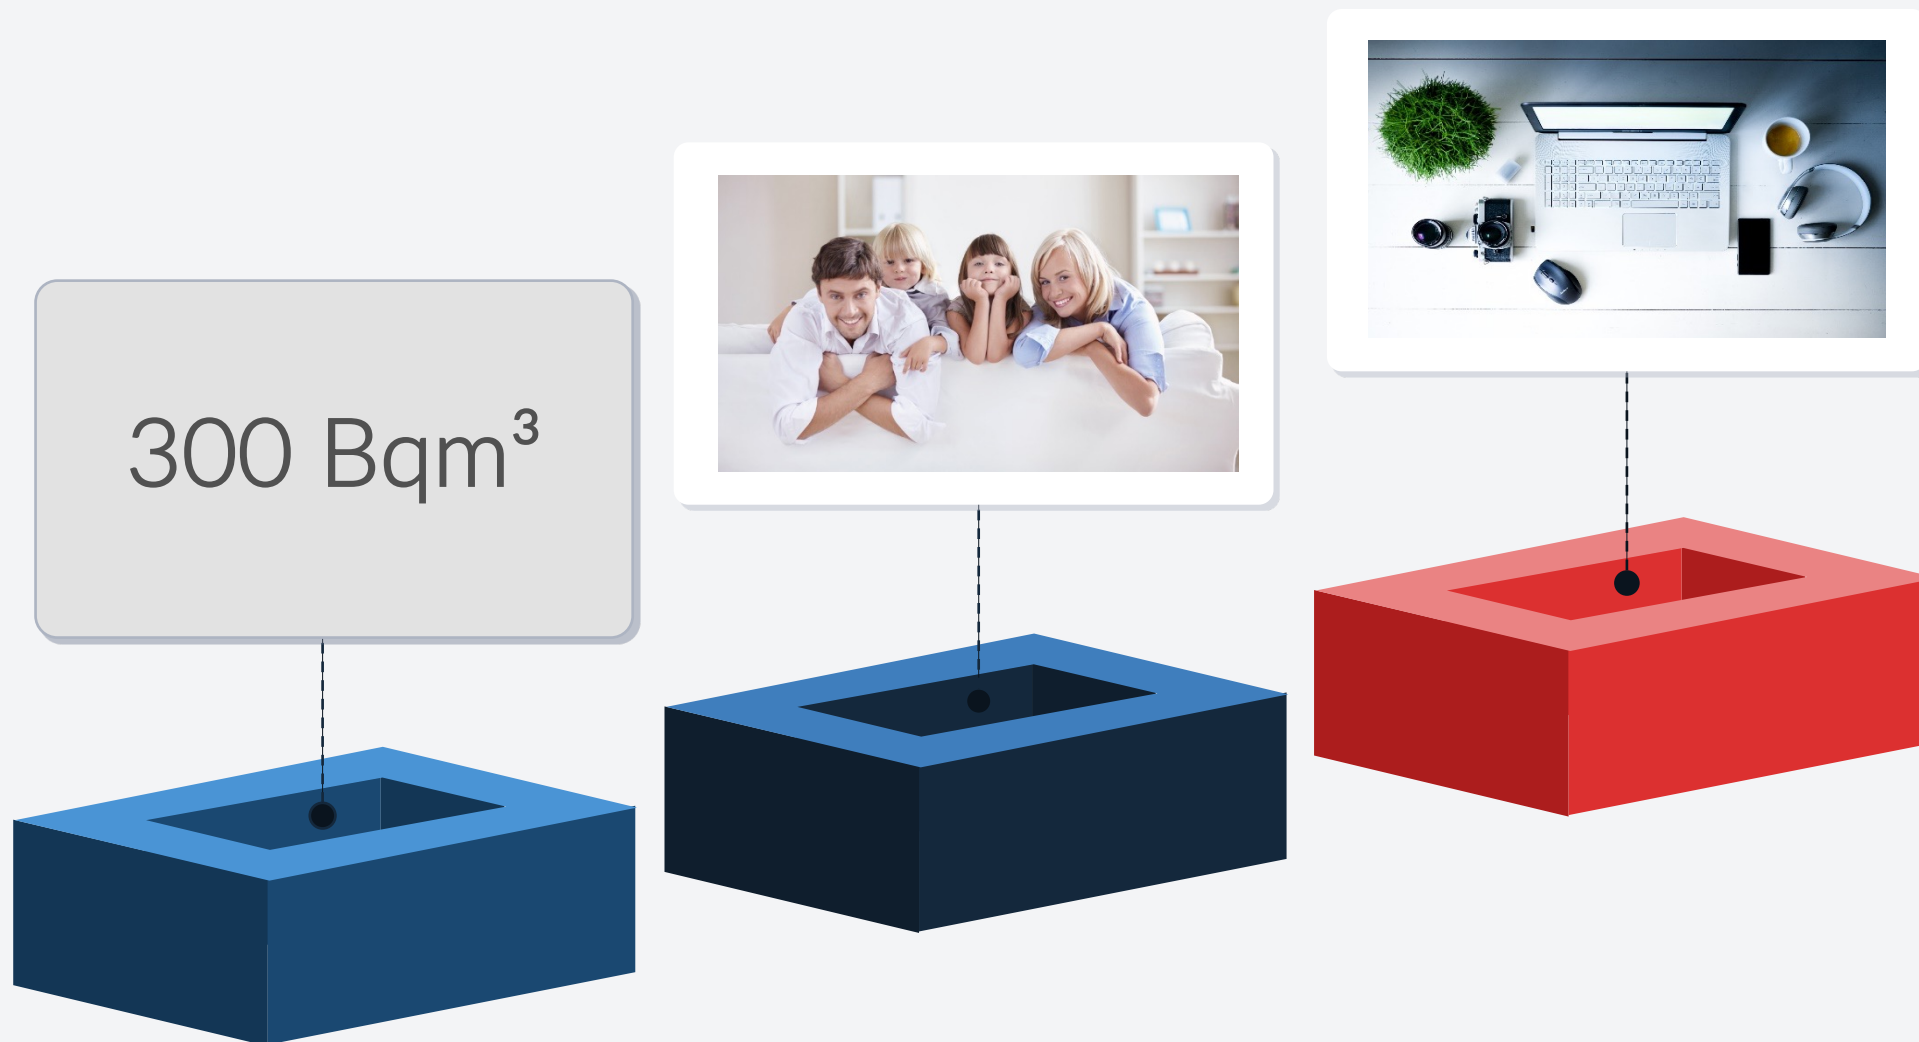

COUNCIL DIRECTIVE 2013/59/EURATOM  
of 5 December 2013

laying down basic safety standards for protection against the dangers arising from exposure to ionising radiation, and repealing Directives 89/618/Euratom, 90/641/Euratom, 96/29/Euratom, 97/43/Euratom and 2003/122/Euratom

# The new directive

## Euratom Basic Safety Standards

Better protection for public and workplaces

# 16 PEACE, JUSTICE AND STRONG INSTITUTIONS

- **EU Directive 59/2013:** 300 Bq m<sup>-3</sup>
- **Strong institutions** – supervision – regulatory control: workplaces, rental apartments, public buildings
- Authorities need reliable and **accredited** measurement results: decisions that involve mitigations

# MEASUREMENTS ↔ MITIGATIONS

# Radon and big buildings

# Challenges

Rn monitoring several places at the same time

Workplaces: Rn levels change over 24 h periods

Workplaces: independent results, trustable values, confidentiality

IAQ issues and parameters

## SPIRIT – Digital IoT Radon Sensor

radonova

The global leader in radon measurement

# Network infrastructure

LoRaWAN Gateway

SPIRIT

Radonovas application  
server

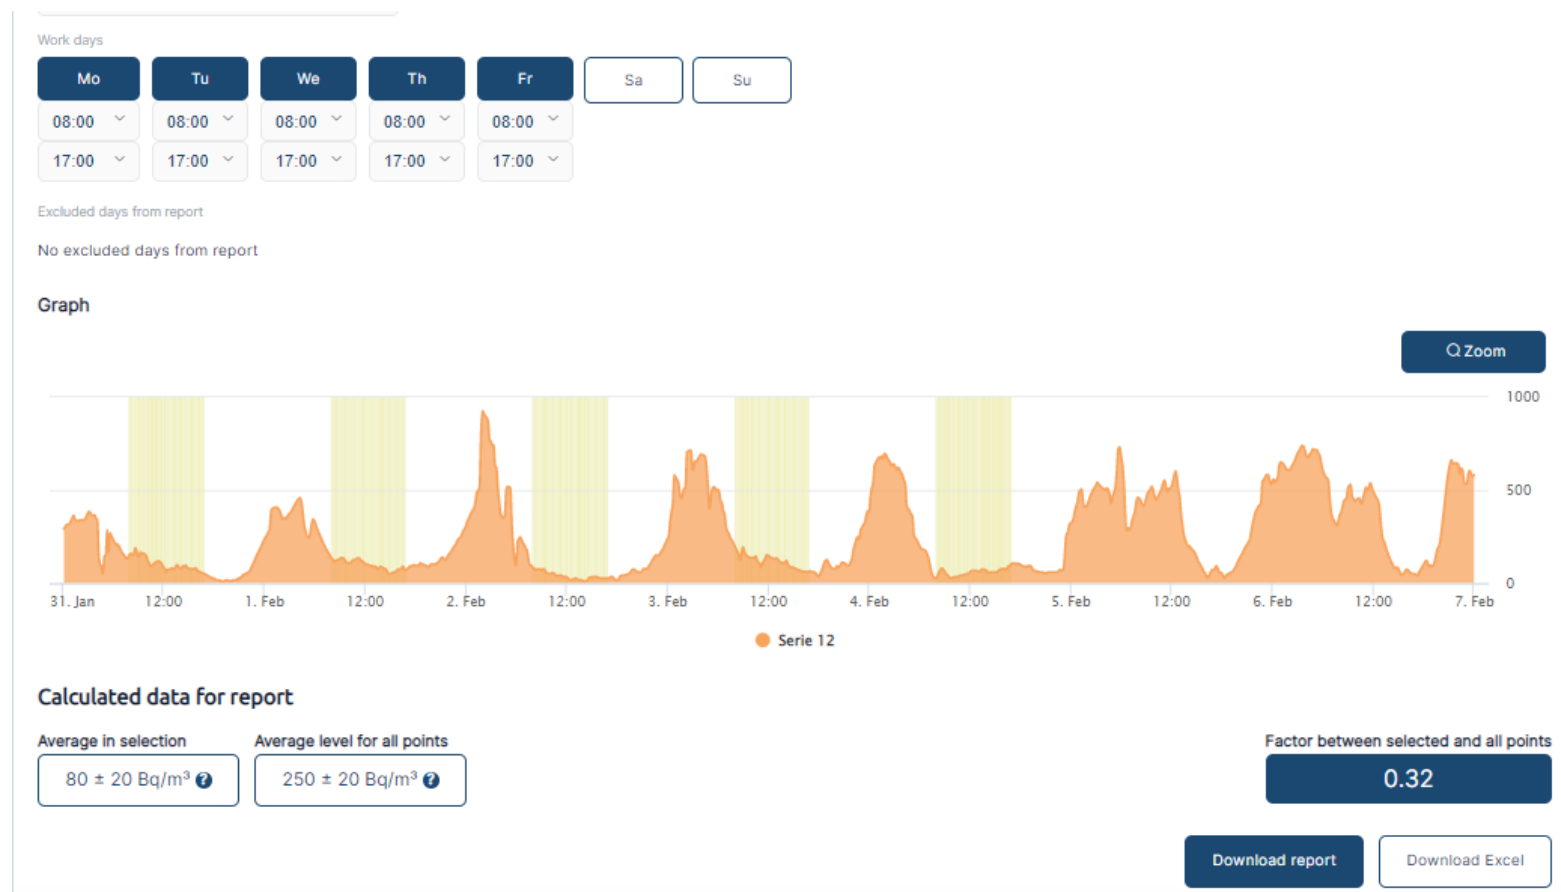

My Pages / API

# A Device for many applications

## Fast response!

- Makes it possible to see variations throughout the day

# Network - LoraWAN

- The radon device uses the network LoRaWAN to send its sensor data. The LoRaWAN gateway can either be part of a larger antenna network, which is building rapidly in Europe, or a portabel “router-sized” gateway that can be used in more remote areas with unreliable network reception..
- The default report interval is 10 minutes for the device.

# Technical specifications

Measurement principle	Semiconductor detector with alpha spectroscopy
Measurement range	0 – 100.000 Bq/m3
Measurement uncertainty	<15 % after 6h @ 200Bq/m3
Sensitivity	8 counts per hours @200Bq/m3
Connectivity	Wireless data transfer LoRaWAN
Temperature range	-10°C – 60°C
Humidity range	0-95%
Power connection	5V Micro USB or 10-28V AC/DC
Battery time	>60 days
Weight	500g

# Proposals

Remote quality control using a centralized sytem

Remote verifications of calibration parameters

Instant notifications to the users

# Goal

**TO REDUCE THE NUMBER OF LUNG  
CANCER CASES ATTRIBUTABLE TO  
RADON EXPOSURE**

# Thank you for your attention
