

Measurement Uncertainty Training Activity

Impact Workshop

14 March 2024

Agenda

This workshop is organized by the [MATHMET MU Training Activity](#). The activity improves the quality, efficiency and dissemination of measurement uncertainty training, by creating new material for measurement uncertainty training at different levels, and by establishing an active community for those teaching measurement uncertainty at metrology institutes, universities, in accreditation and legal metrology. The workshop will spread the produced results, providing a forum for feedback on those output and for the sharing of best practices in measurement uncertainty training, as well as ideas for future needs and developments in the field.
