AI-MATTERS- The Manufacturing TEF

Project duration 60 months

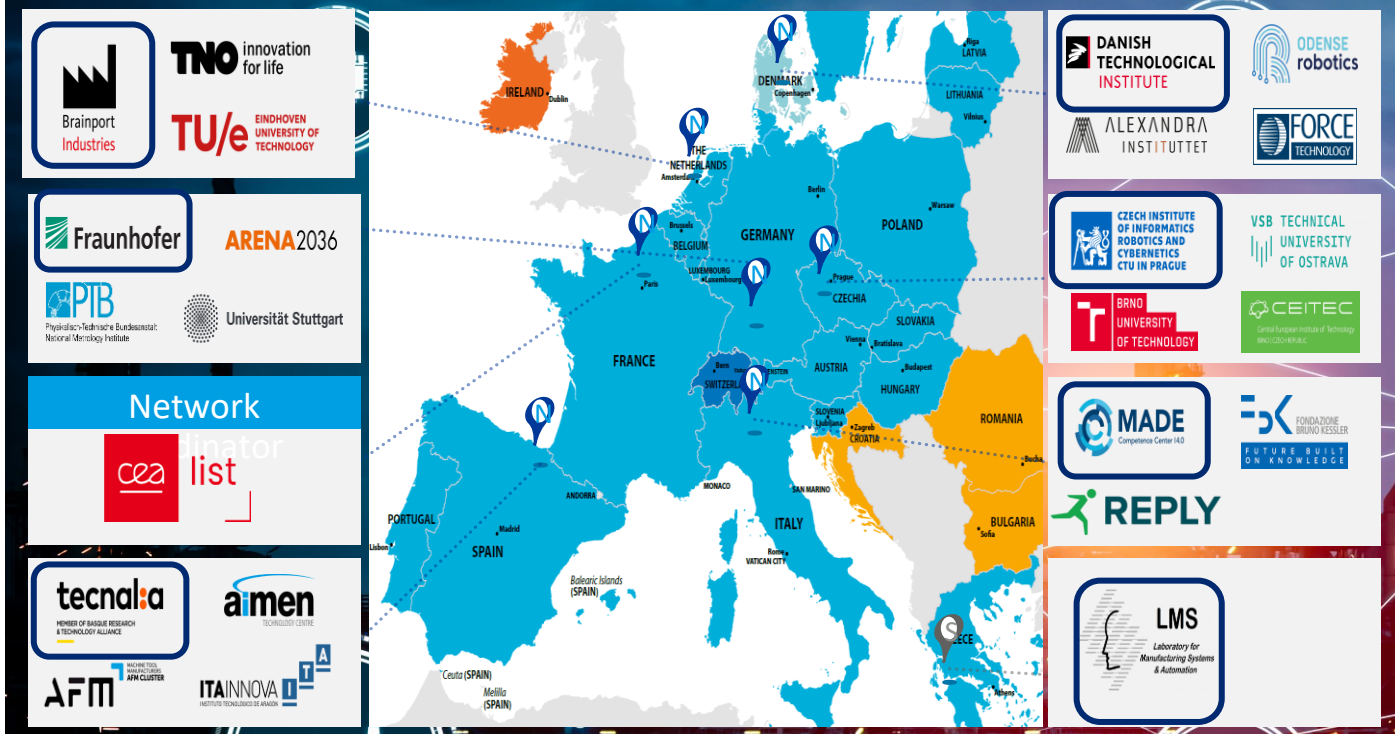

01/01/2023 – 31/12/2027

60 M€ funding; 30 M€ by the EC and 30 M€ by members states and in-kind

Co-Funded by the European Union, under grant agreement number 101100707. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the Directorate-General for Communications Networks, Content and Technology. AI-Matters Network

7 Nodes 1 Satellite

- 4 Challenges
- 50+ Topic
- 140+ Services
- 8 locations
- 24 partners

- ***AI-Matters is a network of seven nodes and one satellite*** aiming at increasing the resilience and the flexibility of the European manufacturing sector through the deployment of the latest developments in AI and robotics, and intelligent, autonomous systems for flexible production.
- ***Coordinated by CEA from the Paris-Saclay*** innovation ecosystem, AI-Matters brings together a consortium of major R&I organizations from ***eight European countries*** (Germany, Italy, The Netherlands, Czech Republic, Greece, Spain and France) including 24 beneficiaries.
- All consortium members bring their expertise in ***manufacturing for different sectors*** such as automotive, space and mobility, textile, recycling, etc.
- AI-Matters offers its customers ***an extensive service catalogue spanning the topics*** above that evolves through continuous updates as needs and expectations of the European manufacturing industry progress.
- Framed under the DIGITAL Europe Programme, AI-Matters actively contributes to enhancing the ***leadership of the European manufacturing industry***.

Co-Funded by the Europ

Challenges in manufacturing industry AI-Matters addresses

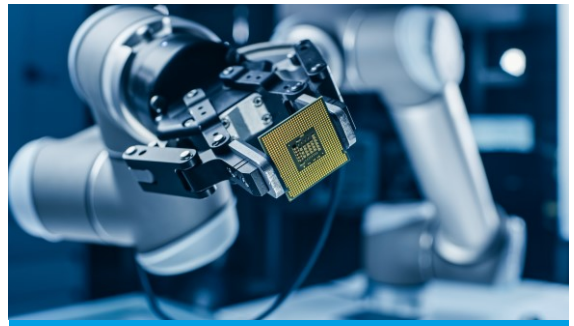

Human-Robot Interaction
Creating efficient, safe collaborations between workers and robots to increase productivity, reduce error rates and improved worker safety

Factory level optimization
Leveraging advanced technologies and process improvements to streamline operations towards enhancing efficiency, minimizing waste, and boosting productivity

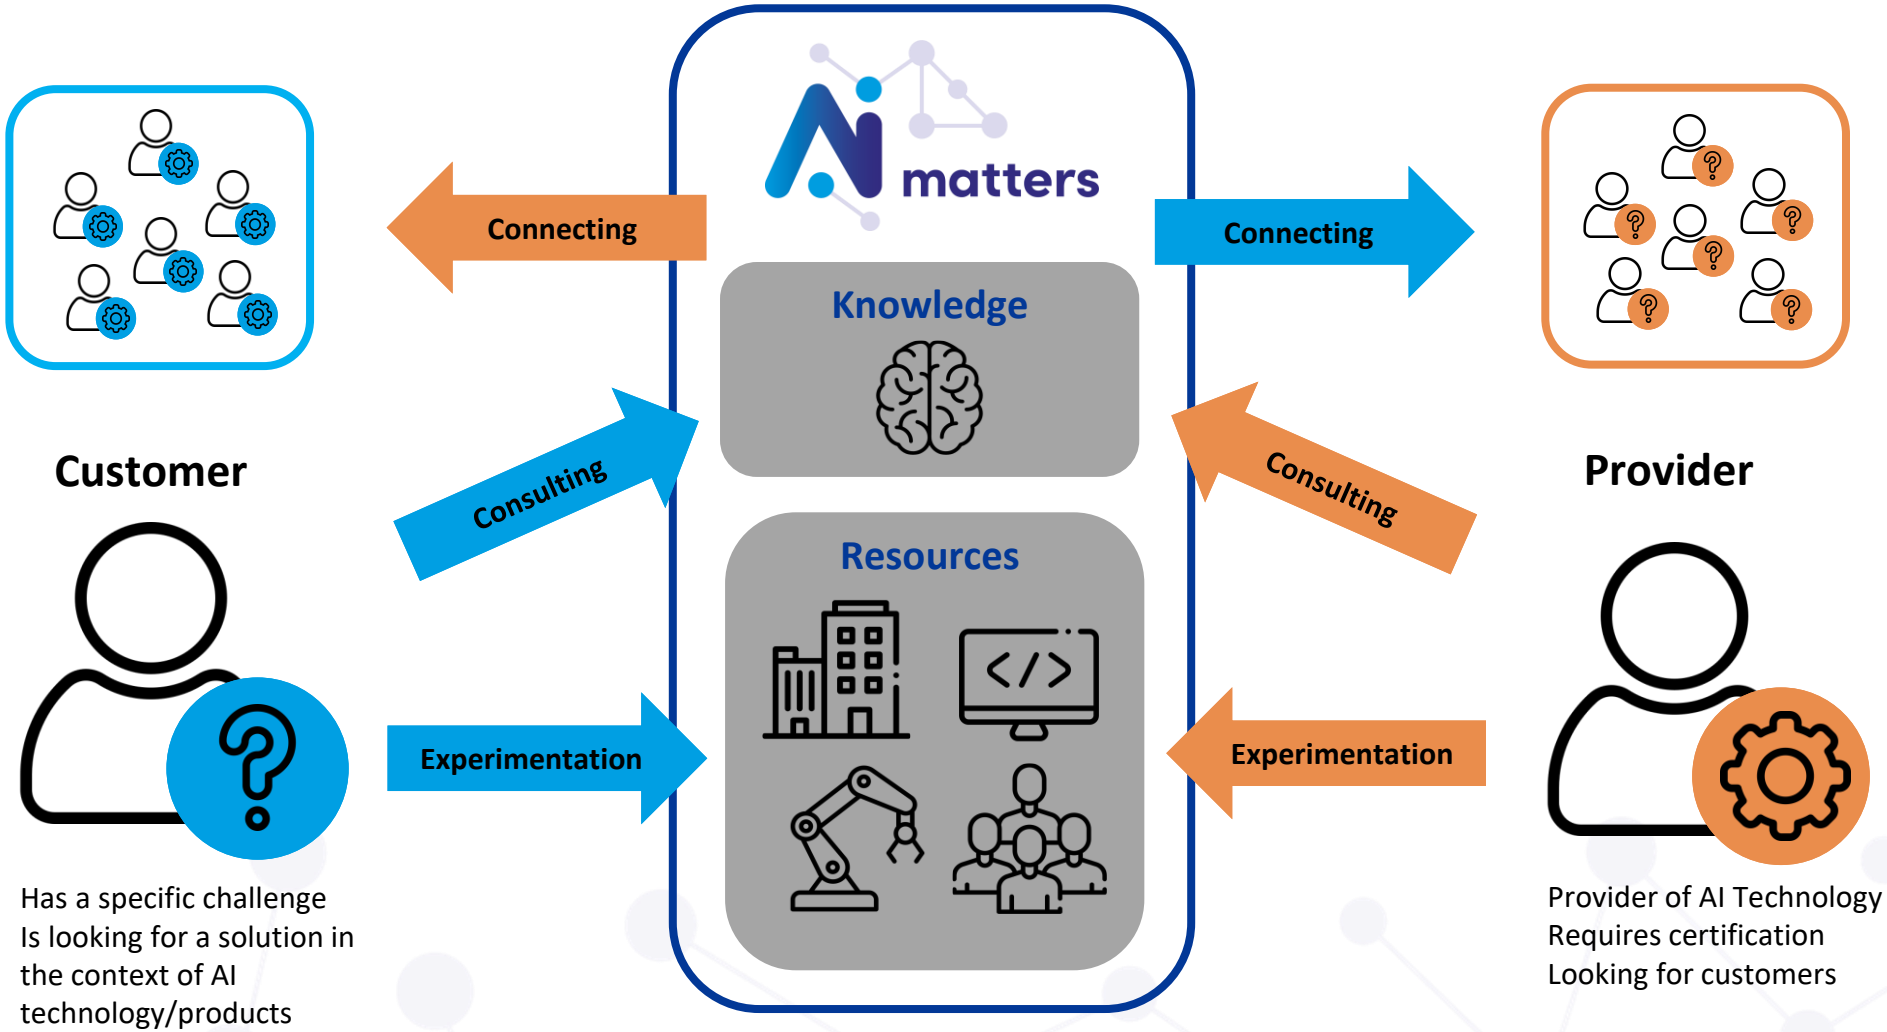

Circular economy
Minimizing waste and making the most of resources, designing products for longevity, reuse, and recyclability, developing sustainable production processes

Other upcoming and enabling technologies
Integrating innovative tools and systems that support and enhance manufacturing processes and facilitate smarter production, supply chain efficiency and product innovation

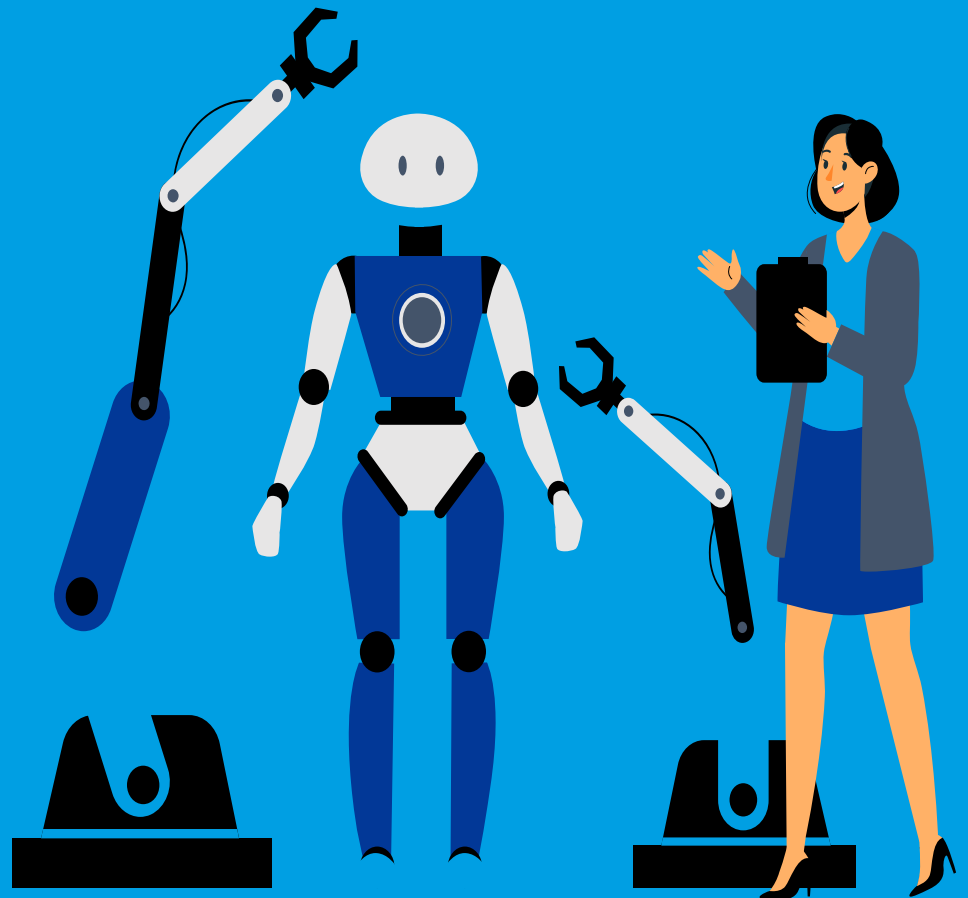

Co-Funded by the European Union, under grant agreement number 101100707.

The AI-Matters Offer

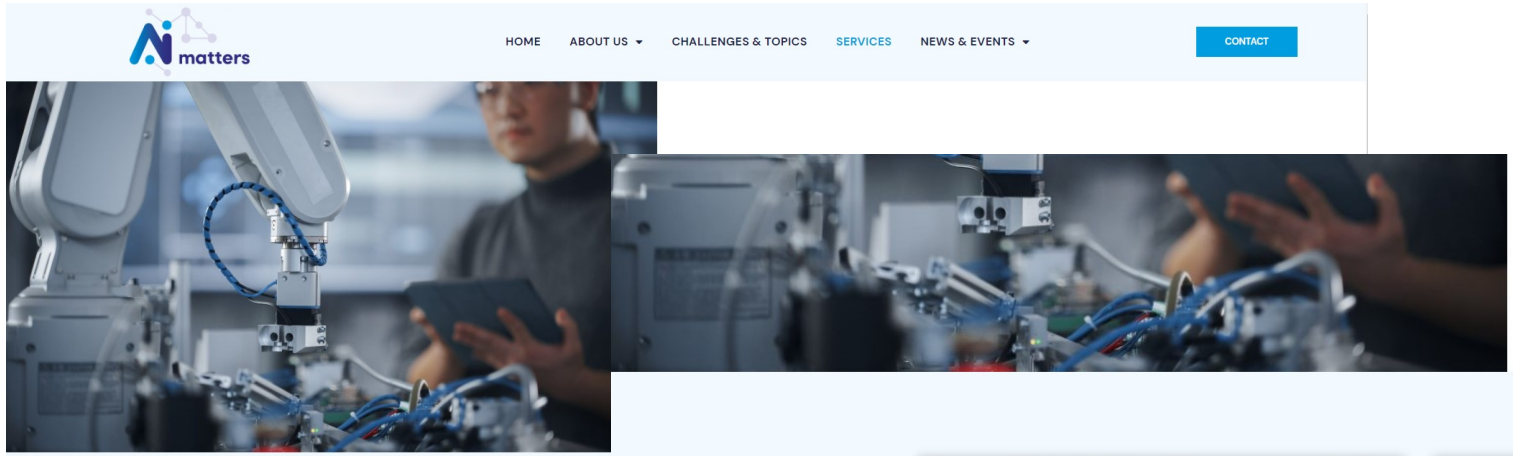

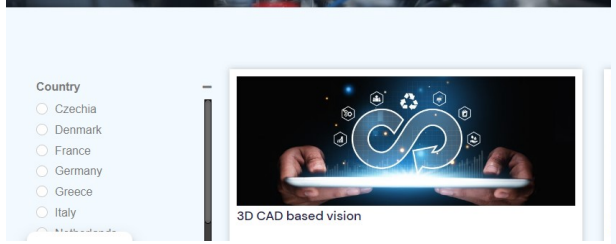

Co-Funded by the European Union, under grant agreement number 101100707.

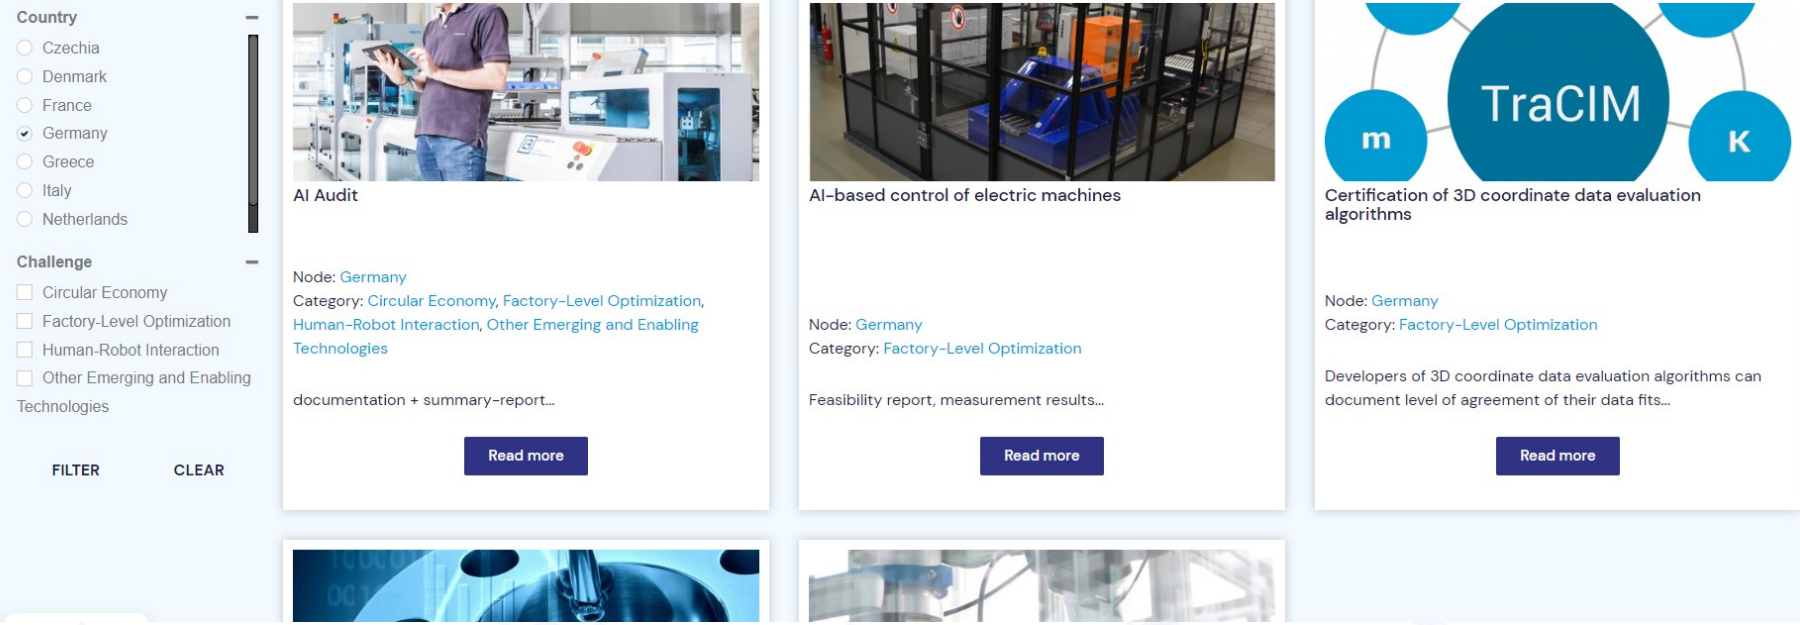

The AI-Matters Service Catalogue

Co-Funded by the European Union, under grant agreement number 101100707.

The AI-Matters Service Examples

Testing the solutions in complex industrial environment in connection to many technologies in customer-defined scenarios

Human-robot interaction

Czech Node

Robotic Intra-logistics Testing

The service offers experiments and tests with robots of different types in complex industrial environments equipped with precise optical localization systems. It also offers support for AI implementation and development of AI-based systems for perception and control in mobile robots including advanced human-machine interfaces.

Co-Funded by the European Union, under grant agreement number 101100707.

Helps customers evaluate intelligent robotic systems for performing complex disassembly tasks

Circular Economy

French Node

Setting Up Test-Bed For Automatic Disassembly Task

A highly integrated and compact system combining a single arm and exchangeable tools with 3D vision sensors, is proposed for disassembling operations. Enhanced with intuitive programming and advanced perception capabilities, it ensures an easy deployment to different use cases.

Co-Funded by the European Union, under grant agreement number 101100707.

Tracking AGVs as they displace items from the warehouse to the workfloor

Factory-Level Optimisation

Italian Node

Asset Tracking Experimentation

Support in asset tracking through the use of selected technologies (e.g., GPS, WIFI, BLE, UWB) based on the company's transportation and logistics requirements.

The service includes an analysis/assessment phase and adoption of the selected technologies for a limited period in order to test and experiment the technical and functional requirement of technology adopted.

Co-Funded by the European Union, under grant agreement number 101100707.

Testing Grippers And Manipulation Strategies, Before Investing Time In Automation

Human-robot interaction

Dutch Node

Dual cobot manipulation

Experiment whether one or two cobots can be used to automate a task in the production line. A single arm could be utilized for product singulation, e.g. in a bin- or heap picking task. The dual arm setup extends the ability towards tasks where humans normally need both their hands. Examples could be (dis)assembly tasks, packaging or introducing products to the production line.

Co-Funded by the European Union, under grant agreement number 101100707.

The AI-Matters launch event in Bilbao

32 BIEMH
YOU MAKE IT BIG

Bilbao full-scale operations launch event, 6th June 2024

tecnalia
MEMBER OF BASQUE RESEARCH & TECHNOLOGY ALLIANCE

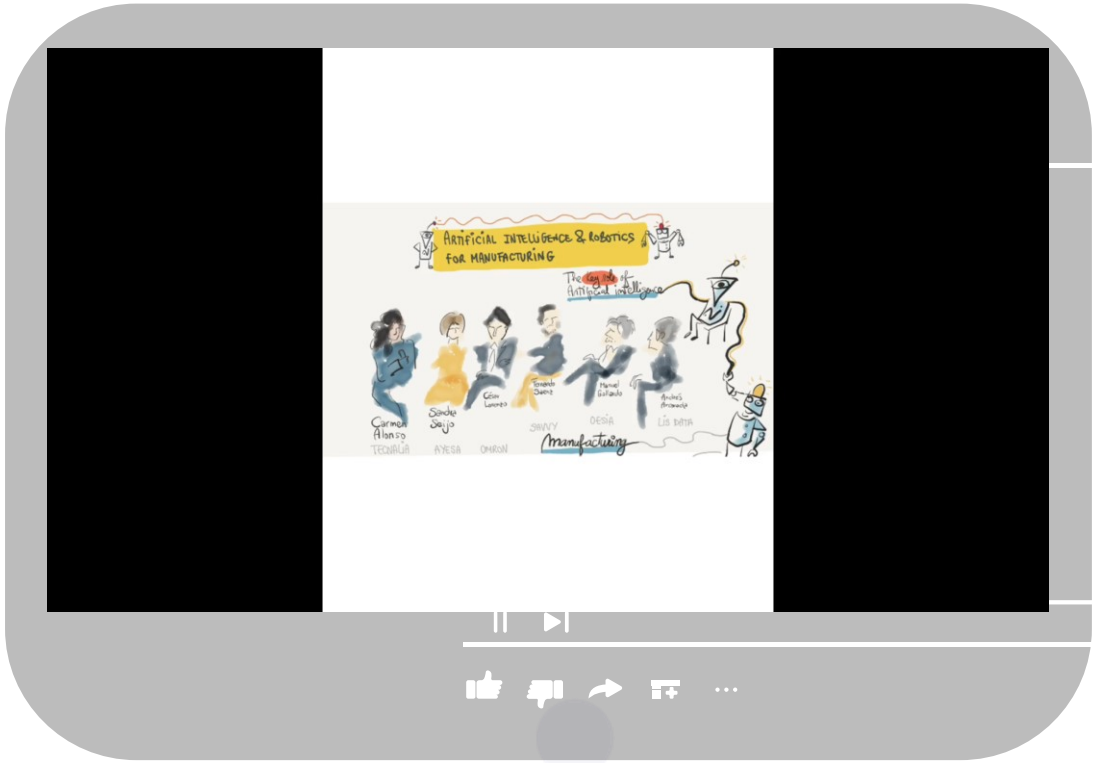

AFM
MACHINE TOOL MANUFACTURERS
AFM CLUSTER

Co-Funded by the European Union, under grant agreement number 101100707.

ARDILUZU

Bilbao full-scale operations launch event in images

(D5.7- Full-Scale operations launch Event provides detailed information)

- Launch event held in the framework of the BIEMH 32nd edition (advanced manufacturing trade show) with a total of 37,614 visitors from 67 countries; 1,604 exhibiting firms from 29 countries.
  - ✓ Attended by 80 participants (project partners, companies, public organisations, research institutes, other stakeholders)
  - ✓ We officially launched TEF services.
  - ✓ The event permitted to understand companies and service provider's needs & challenges and to present some inspirational use cases.
  - ✓ A tour was offered to all participants to learn, exchange and share with some exhibitors.

- Bilbao full-scale operations launch event, organised in combination with the AI-MATTERS Consortium meeting (4-7th June).

Co-Funded by the European Union, under grant agreement number 101100707.
