

Calling all interested parties from standardisation and metrology communities

CEN-CENELEC and EURAMET announce the
3rd STAIR EMPIR Meeting

on **Thursday, 15 December 2016** at the CEN-CENELEC Meeting Centre in
Brussels (Belgium)

**with a focus on normative research for traceable measurements
for the 2017 EMPIR calls**

The European Metrology Programme for Research and Innovation, EMPIR, will launch a call for proposals on pre- and co-normative research projects in 2017.

Participants at this meeting are invited to present and discuss ideas for the call and explore related opportunities for cooperation between the standardisation and metrology communities.

The meeting will start with presentations from the metrology and standardisation communities that will be given the opportunity to present their ideas:

- **EURAMET Task Groups** will present their technical expertise in previous metrology research projects and their ideas for the EMPIR call 2017
- **Standardisation Groups** will present the normative research needs for traceable measurements necessary to provide the scientific and technical basis for the development of their standards.

Round table discussions and face to face meetings will then follow, giving the opportunity for standardisers and EURAMET representatives to discuss potential research topics that address the standardisation research needs using the expertise of metrology institutes. Break out rooms will be made available for face to face meetings.

All interested parties from standardisation and metrology communities are welcome to attend.

Information and registration: research@cencenelec.eu

Deadline for registration: preferably before 23 November 2016 and in any case no later than 5 December 2016 (please note that places are limited)
