

The EMPIR initiative is co-funded by the European Union's Horizon 2020 research and innovation programme and the EMPIR Participating States

European Metrology Programme for Innovation and Research

WORKSHOP

Presentation of ideas in preparation for the:

Targeted Programme Environment in 2016

1st December 2015

Istituto Nazionale di Ricerca Metrologica (INRiM), Strada delle Cacce 91 – Torino - Italy

Organised by EURAMET Task Group “ENVIRONMET” and INRiM

The Environment Targeted Programme will focus on research for robust and stable measurement for monitoring the climate and research into innovative new systems and technologies that precisely assess environmental impacts. A call for Joint Research Projects will be opened in 2016. The European Metrology Programme for Research and Innovation (EMPIR) will launch a call for Joint Research Projects (JRPs) in 2016 on the topic of Environment.

A one day workshop is announced as an opportunity to present and discuss ideas and facilitate the sharing of Potential Research Topics, prior to the next EMPIR Environment call. Interdisciplinary and multidisciplinary ideas and inputs are expected from speakers from National Metrology Institutes and Designated Institutes. The workshop is open to external participation interested in the aims and objectives of the call.

The workshop will be opened by the EURAMET Task Group “Environment” members, presenting the work on preparation of the EURAMET Strategic Research Agenda and the ENV Call Scope. Keynote lectures from the stakeholders community will complete the opening session. The event will be based on oral presentations and round table discussions; the host organisation INRiM will provide rooms for a possible second day of meetings, in case it will be requested, in advance, by the participants.

You are welcome to participate in the workshop and kindly requested to distribute this information to interested researchers. The event is free: please register your attendance by 15 November, following instructions from the INRiM home page www.inrim.it

Titles and abstracts for oral presentations should be sent by **15 November 2015** to Francesca Sanna f.sanna@inrim.it

For general and scientific aspects, do not hesitate to contact Andrea Merlone, EURAMET Task Group Environment Convenor a.merlone@inrim.it
