Glossary

CFS	A certificate on the financial statements
DI	Designated Institute
EMN	European Metrology Network
EU	European Union
NMI	National Metrology Institute

1 Report of the cofunding cost related to the activities described in Part E of the Annual Report

Previously submitted Part E of the Annual Report (cofunded activities) together with this Part F (cofunded costs) detail the cofunding contributed by the Partnership Participating countries. Costs reported here are compiled from the National Cofunding financial reports submitted in accordance with the Cofunding Reporting Strategy approved by the Metrology Partnership Committee according to relevant provisions of the Metrology Decision (EU) 2021/2084. The scope of the National Cofunding activities is given in Section 1.1 of Part E.

Part E of the Annual Report describes the activities reported in 2024, while this document gives a cumulative summary of costs reported throughout the lifetime of the Metrology Partnership. This Report should not be seen as a fully comprehensive list of all National Metrology Institute (NMI) and Designated Institute (DI) costs that are funded from national resources.

Significant changes were made to the Cofunding reporting strategy enabling countries to delay some CFS reporting and arrange a CFS for multiple years whilst ensuring those who have not yet submitted a CFS do so as part of the 2024 cost reporting process.

Greece and the UK have made a commitment to the Partnership but have not yet had the opportunity to report cofunding costs.

1.1 Cumulative Total Cofunding Costs by Year

At the time of writing this report, 39% of the target has been incurred up to the end of 2023 and fully reported. A further 22% of costs were reported but have not yet been arranged the CFSs. The costs incurred in 2024 will be reported later in the year and included in next year's annual report. The graph below indicates that the reporting is progressing significantly ahead of the linear plan, and we forecast that we will meet the target before the end of the programme.

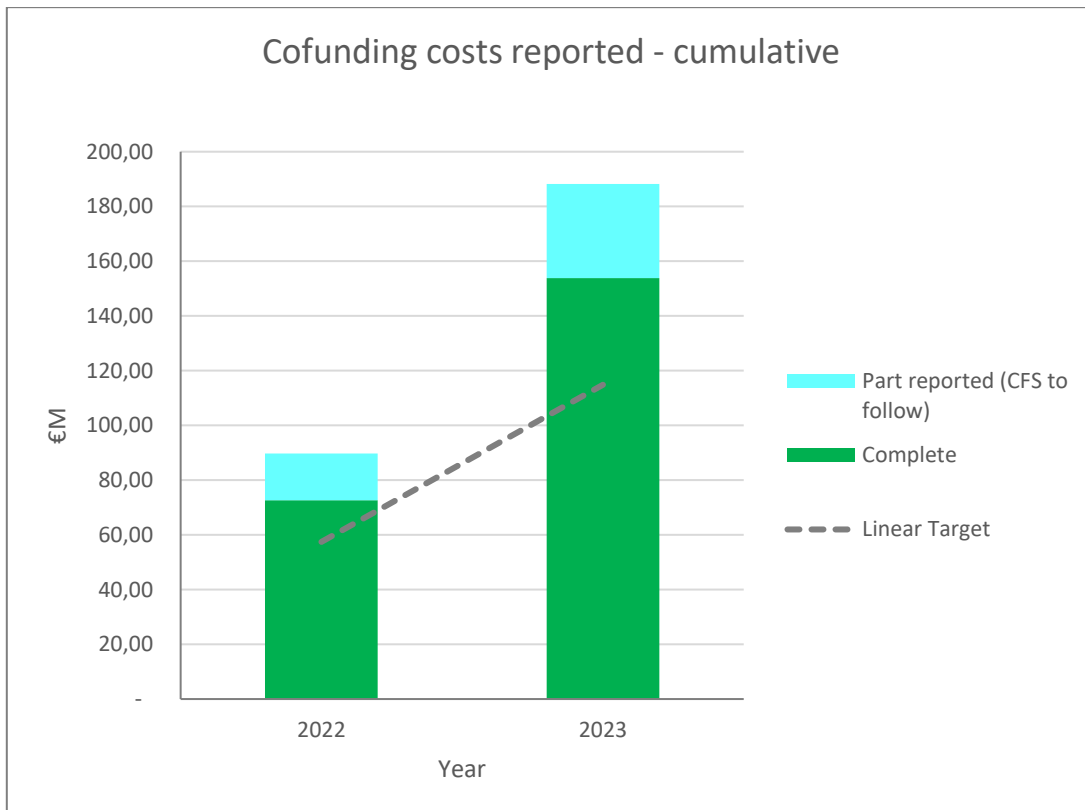

Figure 1. Status of Costs reported.

1.2 Cumulative Cofunding cost by country

Figure 2 illustrates the fully reported costs as of the end of 2024. In 2025, no preliminary cost estimates were requested at the beginning of the year. Instead, participating states will report actual costs in June 2025 as they become available. Most countries are expected to submit a Cost and Funding Statement (CFS), including actual costs at that time. As a result, the figures presented are based on actual costs from 2023, which were reported in June 2024 and submitted to the Commission with the updated Part F (version 1.1) on September 2, 2024.

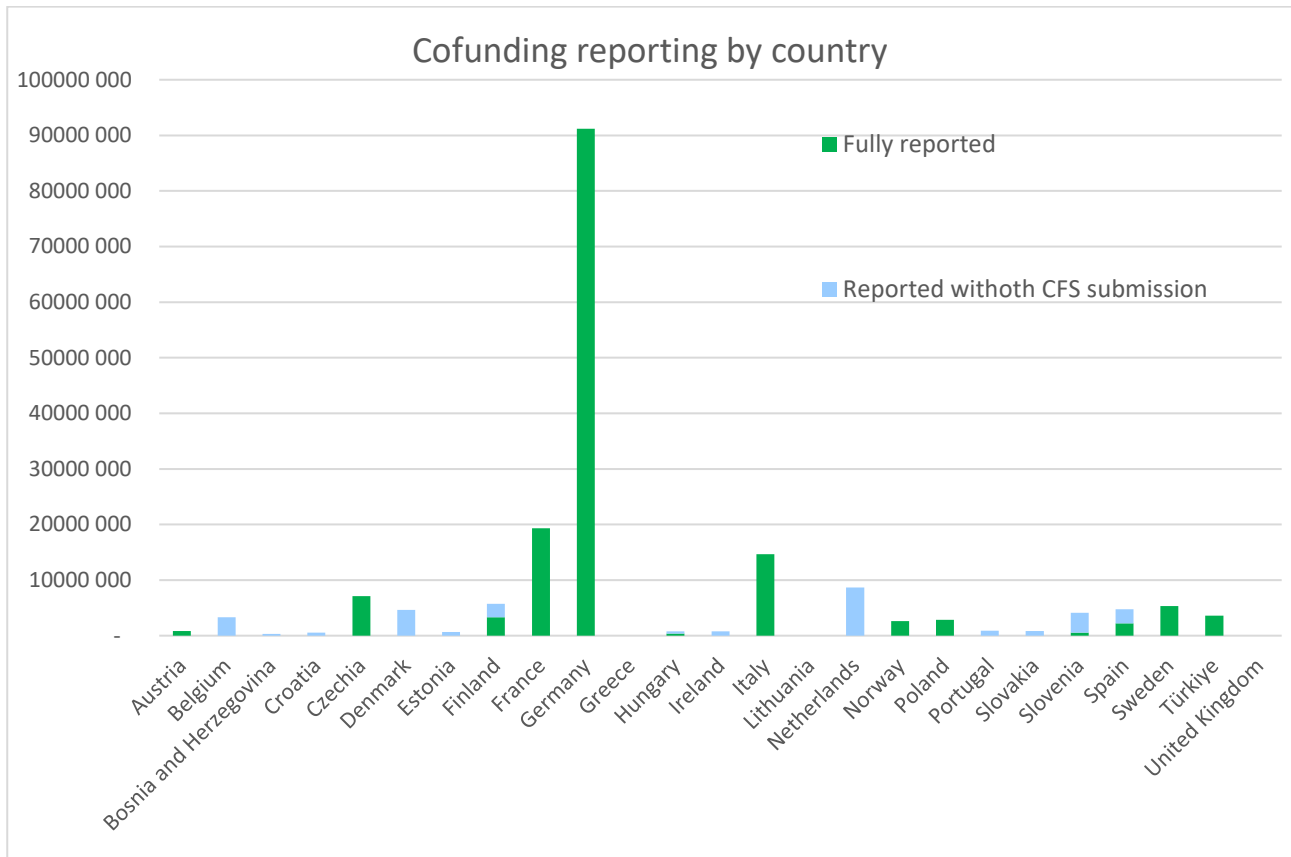

Figure 2. Cumulative Cofunding Reporting by country for 2023.

1.3 Relative commitments of the participating countries

The relative National Commitments of the 23 countries participating in the Metrology Partnership are shown in Figure 4.
