

## Calibration Guides and Expert Reports for Electromagnetics

Reference	Title
GPG73	Calibration & use of antennas (in the frequency range 30Hz to 40GHz) <a href="#">Calibration &amp; use of antennas GPG73 - NPL</a>

### NPL Good Practice Guides (GPG)

NPL's Good Practice Guides are a practical and informative series of documents designed to meet the needs of industry. They are a user-friendly way to find out about what to measure, how to measure it and how to understand the results. Based on NPL's expertise and experience, the guides will enable you, your customers and your suppliers to be in agreement on measurement issues.

Annex – Abstracts

GPG73	This document addresses the calibration of antennas in the frequency range 30 Hz to 40 GHz. Guidance is given on the assessment of uncertainties in their use for radiated emission measurements according to EMC standards.
